

Alfred Teves Brake Systems Pty Ltd

Energy Policy

This policy sets out Alfred Teves Brake System's Energy Programme, based on industry best practice, and the requirements of legislation and building regulations, but cognisant of the operational needs of the organisation.

Alfred Teves Brake Systems seeks to be a responsible energy manager, promoting energy efficiency throughout its operations, and reducing our use of energy resources. We also promote the importance of good energy management for the economic, social and environmental well-being of its employees, customers and businesses.

Alfred Teves Brake Systems as a nationally recognised market leader in aftermarket brake system components is committed to:

- Improving our energy performance
- Reducing our emissions of greenhouse gases
- Reducing our energy usage
- Reducing our dependence on finite fossil fuels

We are committed to a process of continual improvement of energy management and through the implementation of this policy we will be:

- Setting objectives and targets and developing energy action plans
- Measuring energy use on an ongoing basis and using this information to regularly review policy, objectives,
- Targets and the allocation of resources
- Educating and training contractors involved in building operations to ensure they deliver services in an energy efficient manner
- Raising awareness amongst employees on energy usage; encouraging, guiding and supporting staff to act in accordance with this energy policy
- Ensuring all major programmes including procurement of products, services or design activities undertaken within the company, consider the ongoing energy related costs – total cost of ownership as part of the investment assessment criteria.

G Ting Chong
Managing Director
